UX Architecture

EXPERIENCE

Transamerica

Director, Mobile Development 2016-current

- Rewriting current mobile enterprise in Cordova, AngularJS, Ionic.
- Rewriting web services to optimize data delivery
- Developing continuous integration to push on agile schedule
- Bypassing app stores for hot deploys
- Integrating marketing automation to serve relevant messaging

Transamerica**Director, Web & Mobile Development 2014-2016**

- Conceptualized, planned, and executed responsive designs and architectural frameworks for a wide range of website and mobile properties
- Centralized mobile development by creating reusable components that are designed to be agnostic of encapsulating systems, and that can be leveraged into a number of other projects, accelerating development
- Overhauled and simplified current mobile security model to integrate TouchID and Keychain Access
- Rapidly prototyped new capabilities to assess usability of PAAS, BAAS, mBAAS

Transamerica**Director, Web & Mobile Strategy 2013-2014**

- Created effective marketing messaging using web and mobile technology
- Collaborated with internal customers and the editorial team on marketing technology in sales finals
- Created mobile augmented reality engine to enhance marketing print design
- Established cloud based tag management system to unify disparate marketing systems (Salesforce, Hubspot, ExactTarget, Google Analytics, Data Mart) as well as take real time actions in big data initiatives

Transamerica**Senior Developer 2000 - 2009**

- Designed, developed, and deployed kiosk network used by healthcare systems nationwide
- Worked as member of a 4 person team to develop Retiretek (currently OnTrack[®]), an interactive retirement forecast modeling engine, Winner of Yahoo 100 best sites
- Spearheaded in-house green screen studio and video technology for use in Adobe Flash interactive content
- Developed interactive content for all website properties
